DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, 33-39, drawn to receiving a message and saving user operating characteristic, classified in class 345, subclass 728.
 - II. Claims 12-18, drawn to analyzing message type, classified in class 345, subclass 739.
 - III. Claims 19-32, drawn to arranging a group of user operating characteristic in a message and transmitting a message, classified in class 345, subclass 749.
 - IV. Claims 40-45, drawn to generating a message and transferring the message, classified in class 345, subclass 748.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as receiving a message and saving user operating characteristic; invention II has separate utility such as analyzing message type; invention III has separate utility such as arranging a group of user operating characteristic in a message and transmitting a message; invention IV has separate utility such as generating a message and transferring the message. See MPEP § 806.05(d).

Art Unit: 2676

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Donald E. Stout on 09/29/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
